

# UBC Directory

Felix Aksentsev | Manager, Internal Business Applications

---

This document captures 5-years Roadmap for UBC Directory, a web application to look up the contact information of staff at UBC. This service includes:

- Personal and organizational searches.
- Administrative interface that allows adding, editing, or deleting personal and departmental information.
- LBS interface that allows associating building names with staff and editing the announcement mailing list subscribers for each building.

Year	Milestones
2010	Upgrade UBC Directory infrastructure and search algorithms – completed Exit UBC Directory print out - completed
2011	Integrate UBC Directory database with IAM data layer Develop UBC Directory interface for mobile devices Deploy self-printing UBC Directory backups
2012	Re-design and re-platform UBC Directory Application using Google technology and modern programming tools
2013	UBC Directory Infrastructure Upgrade – add application nodes/servers (TBD)
2014	TBD
