

<b>Project:</b>	Virtual Desktop Pilot Implementation Project
<b>Project Manager:</b>	John Mah
<b>Status Period:</b>	February 22, 2010

## Project Status Report

Based on the colour legend below, indicate the status for the reporting periods of each item. Any item classified as Red or Yellow requires an explanation.

**Green** – Strong probability that all project commitments will be met (on time, within budget, acceptable quality).

**Yellow** – Good probability that most project commitments will be met but changes to schedule, budget, resource or scope may be required.

**Red** – Probable that project commitments cannot be met without changes to schedule, budget, resources and/or scope.

	Previous Status	Current Status	Explanation
<b>Scope</b>	n/a		
<b>Schedule</b>	n/a		UBC IT pilot start is pushed out to April/May, to allow for completion of OAB pilot deployment. P.Stevens is agreeable to the OAB deployment delay, but would like an update from the PM on the new completion date for them.
<b>Budget</b>	n/a		
<b>Risk</b>	n/a		IT reorganization has lead to a delay of 3 weeks in the testing schedule.

### Issues or Risks:

- **Recent IT reorg** has changed a number of project roles – esp in Desktop services. PM is working actively to ensure transition of knowledge or retention of current resources to complete project tasks to 3/31. Focus is on OAB completion for 3/31 requiring 2 FTE resources for 2 weeks. UBC IT schedule will slide into April.

### Activities Not Completed Last Period:

- Work with SunRay in the background to link the CompSci SR environment to the VDI backend lab. CS to perform TC testing.
  - Extend the sw View client access to Comp Sci team members.
- Infrastructure + Virtual Desktop Images
- ~~Bin~~Virgil to virtualizing the finance applications
  - Installation of KMS services and Thin-client firmware services on the UBC IT Desktop support network
- Pilot users
- QA testing of user state discovery process (H:, profiles, type of PC, want a TC, CWL credentials etc)
- Support/deploy/image management processes
- Complete the image management processes; review and signoff by R.Padwick
- User lab testing of VDI Images
- OAB QA image rev2 release
  - Lab testing logistics planning, dates, established
